To whom it may concern, This is to voice my concern over the NAB's petition 04-160 restricting what XM radio is allowed to broadcast.

Being a OTR truck driver XM radio has benefited me greatly since it began offering it services several years ago. I was one of the first to sign on and have really enjoyed the variety of music and talk they offer. With the addition of the local weather and traffic reports it has increased its benefit.

Many parts of the country, picking up any station is at best a challenge and at worse impossible. I remember night time was the only time you could pick up anything, and it wasn't very consistent. XM changed all that.

The local weather and traffic reports are a great benefit to the truck driver, (alternate routes during traffic tie ups, etc.) and it can be distracting searching around for the local station when you drive through so many cities. Pls leave XM radio alone.
